

ARIZONA WORKFORCE

EMPLOYMENT REPORT

January 20, 2011

Private Sector Posts Modest Seasonal Gains Led by Retail Trade; Unemployment Rate 9.4%

Arizona's seasonally adjusted unemployment rate for December remained unchanged at 9.4%. The U.S. unemployment rate declined almost half of a percentage point from 9.8% in November to 9.4% in December. A year ago the U.S. rate was 9.9% and the Arizona rate 9.2% (see figure 1). Both the Arizona rate and the U.S. rate have been above 9% for over a year and a half.

Arizona's Nonfarm employment gained a modest 0.1% (+3,400 jobs) in December. The previous two Decembers (during the recession) posted losses. Before the recession ('98-'07) the average rate of gain for December was 0.5% (see figure 2). The Private Sector added 7,000 jobs while Government lost 3,600. Both the Private sector gains and the Government losses were mostly seasonal. The Private sector gains were below historical average for December while losses in Government were above

Figure 2

historical average. The majority of losses in Government were in Local Public Education from holiday breaks, but there were also losses in other State and Local Government agencies. Federal Government showed only slight employment gains (+0.4%).

Among the eleven major sectors, Trade, Transportation, and Utilities (TTU) had the largest over-the-month gains, dominated by seasonal hiring in Retail Trade. Of the 7,100 jobs gained in TTU, 4,000 were in Retail Trade. While these gains are better than both Decembers during the recession years, they are not quite up to pre-recession rates. The pre-recession ten-year average ('98-'07) for TTU was a gain of 8,200 jobs in December. General Merchandise along with Clothing and Accessories stores accounted for most of the retail job gains.

More often than not the Leisure and Hospitality

(LH) sector gains jobs in the month of December. LH posted gains in fifteen out of the last twenty Decembers. The 1.1% gain in Leisure and Hospitality last month was better than the average December gain. All industries in LH gained jobs for the month, but Food Services and Drinking Places were responsible for over two thirds of the LH job gains.

Another sector that gained in December was Manufacturing, which added 1,400 jobs. The vast majority of Manufacturing gains were in Nondurable goods (+1,300). Financial Activities gained 800 with Credit Intermediation and Related Activities adding 600 of the 800 jobs.

Professional and Business Services (PBS) also added 800 jobs. Within PBS, the Professional Scientific and Technical Services industry added 800 while gains and losses in the other industries in PBS offset each other. Educational and Health Services added 300 jobs. An uncharacteristic loss of 400 jobs in Health Care offset some of 700 jobs gained in Educational Services.

The remaining five major sectors all lost jobs in the month of December, with construction posting the most losses (-4,200). The losses were primarily in Building Construction and Specialty Trades. Monthly Construction employment job gains and losses from January through December 2010 have essentially cancelled each other out with a net effect of the sector being flat for the year. Seasonal losses in Local Public Education were responsible for most of the losses in Government, but there were some losses in other State and Local agencies with slight gains in Federal Government employment.

Summary

Overall in December, six major sectors posted job gains and five had losses (see figure 3). Trade, Transportation and Utilities (TTU) had the most gains in December, adding 7,100 jobs. Retail accounted for 56% of the gains in TTU. Most of the gains in Retail were from General Merchandise and Clothing and Accessories stores. Leisure and Hospitality (LH) added 2,800 jobs. LH typically gains jobs in December, posting gains in fifteen out of the last twenty Decembers. Food Services and Drinking Places were responsible for over two thirds of the LH job gains. Manufacturing added 1,400 jobs, with almost 93% of the gains in Non Durable goods. For more details on each sector and published industries for the state, metro areas, and counties, see the tables starting on page seven.

Arizona's employment situation continues to show some signs of gradual improvement. Over the month, the gains in Total Nonfarm employment for December were less than pre-recession averages, but better than the previous two years. Over the year comparisons indicate Arizona employment improvements are at a pace slightly better than the nation as a whole. The unemployment rate in Arizona remained unchanged from the previous month at 9.4% while the U.S. rate dropped from 9.8% to 9.4%.

— Equal Opportunity Employer/Program —

Under Titles VI and VII of the Civil Rights Act of 1964 (Title VI & VII), and the Americans with Disabilities Act of 1990 (ADA), Section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975, the Department prohibits discrimination in admissions, programs, services, activities, or

employment based on race, color, religion, sex, national origin, age, and disability. The Department must make a reasonable accommodation to allow a person with a disability to take part in a program, service or activity. For example, this means if necessary, the Department must provide sign language interpreters for people who are deaf, a wheelchair accessible location, or enlarged print materials. It also means that the Department will take any other reasonable action that allows you to take part in and understand a program or activity, including making reasonable changes to an activity. If you believe that you will not be able to understand or take part in a program or activity because of your disability, please let us know of your disability needs in advance if at all possible. To request this document in alternative format or for further information about this policy, contact the Department of Economic Security, Division of Developmental Disabilities ADA Coordinator at 602 542-6825 ; TTY/TDD Services: 7-1-1.
